Quality, Service & Commitment

MASTERDRIVE
POWER TRANSMISSION PRODUCTS

COMPANY PROFILE

www.masterdrives.com

Who We Are

MasterDrive® is Quality and Excellence.

We are an International Supplier of Power Transmission Products.

We are proud to call Wisconsin our headquarters for offices, distribution and machining center since 1998. MasterDrive has representation throughout North and South America and warehousing in the United States and Canada to efficiently serve our customers needs. It is our promise to the industry to provide the best quality gray and ductile iron products available. From our smallest standard part of a few ounces, up to the largest MTO part nearly 6,000 lbs and 60" in diameter; quality, excellence, and commitment are what you will find. Our complete PT line of products, MTO capabilities, engineering assistance, and customer service second to none backs MasterDrive's Distributor Programs and OEM support. Our philosophy is; Quality, Service, and Commitment!

Manufacturing Facilities Allow Made to Order Capabilities

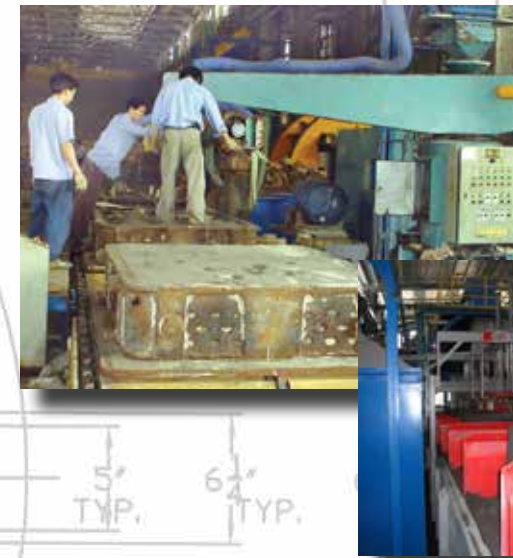

Iron Classes for Melting and Pouring

Gray: ASTM 25 thru 35
Ductile: ASTM 65-45-12 & 80-55-06

Sizes range from a few inches in diameter up to 6,000 lbs cast weight.

Our manufacturing plant, Fuzhou Min Yue Mechanical & Electrical Co., Ltd is located near Fuzhou, China. In addition to our full line of power transmission products, we offer our foundry and machining centers for all types of gray and ductile iron MTO items. Together we offer complete manufacturing and engineering support, as well as sales, customer service, and warehousing.

Engineering and Print Design

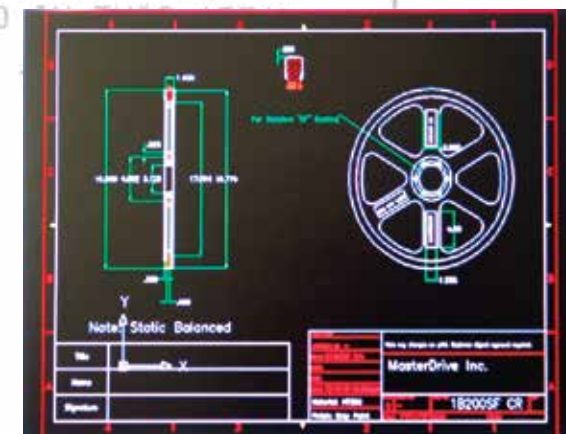

MasterDrive offers these services overseas AND in our main facility in Wisconsin. This enables us to provide even more timely shipments, a broader product range, and offers our customers many made-to-order products with greatly reduced lead times. In conjunction with our foundry, we are your made-to-order specialists for almost any design or application. Our engineering staff can work from your CAD drawings, or make them for you. Their expertise and design excellence is available to serve all needs

Machining and Processes
